

WAC.3®

Wyssen Avalanche Control Center

Safety through innovation

WYSSSEN switzerland **avalanche control**

WAC.3® Software Modules

Name	Function
WAC.3® Cockpit Basic <u>with Wyssen Hardware</u> <u>without Wyssen Hardware</u>	<p>Information and communication platform for decision-making</p> <p>Individual overview of relevant data such as weather stations or avalanche bulletin. Journal with simple notes function allows clean documentation.</p> <p>**Installation costs: Integrating of the cockpit and the desired data sources, charged on a time basis.</p>
WAC.3® Cockpit Pro	<p>Upgrade for the WAC.3® Cockpit Basic</p> <p>Supported documentation and optimized workflow thanks to additional functions. Map view with external information sources and dynamic (event) data. Automatic creation of seasonal reports using the evaluation tool.</p> <p>**Installation costs: Integrating of the cockpit and the desired data sources, charged on a time basis.</p>
RiskEval Basic	<p>Simple risk analysis and action planning</p> <p>Process-based risk assessment and planning of measures taken. Digital mapping of a simple situation assessment, simple input tool for individual observations.</p> <p>**Installation costs: Configuring the forms according to the safety concept</p>
RiskEval Pro	<p>Complex risk analysis and action planning</p> <p>Process-guided hazard assessment and planning of measures. Digitization of complex safety concepts; the prerequisite is an up-to-date and well-founded safety concept developed by a by an engineering office with corresponding experience. Coupling to WAC.3® modules as well as communication to external parties possible.</p>
HeliTrack	<p>Recording avalanche blasts in the field</p> <p>Mobile and simple recording of location, time and success of avalanche control by helicopter</p> <p>**Installation: none required, integration of mapped avalanche paths if desired</p>
ExploDoc	<p>Inventory of explosives</p> <p>Simple accounting for incoming and outgoing explosives</p> <p>**Installation costs: Setting up the storage and items on a time basis</p>
ComTool	<p>Communication Assistant</p> <p>Semi-automatic communication for team coordination internally or releasing information to the public</p> <p>**Installation costs: Setting up the communication channels and the list of recipients on a time basis, largely executable by the operator</p>

**Installation, adjustments, etc. are charged according to time and effort (2h included)
